

Z+1 Pro (Gen 3)

Extension Kit for an Additional Monitor

Z+1 Pro (Gen 3)

Setup Extension

Flexible Alignment

Easy Installation

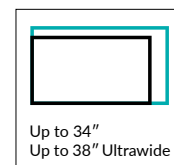

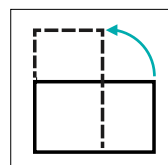

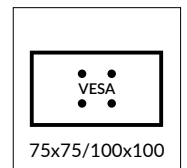

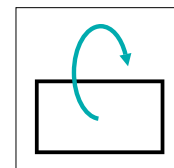

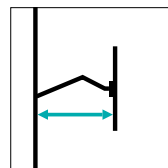

Cable Management

The combination of flexibility and ergonomics already make ARCTIC monitor arms a great choice for working or gaming; get even more out of your ARCTIC monitor arm with the Z+1 Pro (Gen 3). The extension arm is compatible with most monitor arms of ARCTIC's Pro and 3D series and is easy to install. This means you can instantly add more viewing area and flexibility to an existing setup at the turn of a hand. Thanks to VESA standards 75x75 and 100x100, the Z+1 Pro (Gen 3) is compatible with most flat panel displays and carries up to 15 kg with ease.

Extension Arm for an Additional Monitor

- Compatible with Z1 Pro (Gen 2+3), Z2 Pro (Gen 2+3), Z3 Pro (Gen 3), Z1-3D, Z1-3D (Gen 3), Z2-3D, Z2-3D (Gen 3)
- Enables to install an additional monitor
- Flexibility in the alignment
- Can be used in landscape and portrait format
- Integrated cable management

An Upgrade for the Monitor Setup

With the Z+1 Pro (Gen 3) you get the perfect upgrade to top your monitor setup. Whether you currently use on one, two or three monitors, the extension arm is easily attached to the existent mount, extending the viewing area.

Adjusted All Around

Individual construction, individual adjustability: The ball joint design of the mounting head offers increased flexibility for 360° rotation, 180° swivel and +/-15° tilt.

Excellent Compatibility

Thanks to VESA standards 75x75 and 100x100, the Z+1 Pro (Gen 3) is compatible with most flat panel displays. It carries loads up to 15 kg and supports classic monitors up to 34 inches, ultra wide monitors up to 38 inches.

Fast and Simple Setup

Integrate an additional monitor into the current system, and that at the turn of a hand: in a few steps the dual threaded pole of the Z+1 Pro (Gen 3) is installed and the monitor arms are realigned.
